What ZenMixer Does

ZenMixer is a cross-chain privacy protocol built for the new decentralized era. It lets you mix assets across

and more, while erasing traceability at every step.

Why ZenMixer Matters

ZenMixer is designed to bring true financial privacy to blockchain users worldwide. Through asset mixing and stealth wallets, it shields your transactions from surveillance and analysis.

Multi-Network Privacy

Mix funds across

removing traceability between chains.

With a Telegram bot
already live and a stealth
wallet on the way,
ZenMixer makes true
anonymity accessible to
anyone. Whether you're
protecting casual transfers
or securing large-scale
holdings, it ensures your
privacy stays intact

Roadmap

Week 1

Mixer Bot Launch Ethereum, Solana, and
Optimism Mixing Integration BTC - ETH
cross-chain testing

Week 2

Ethereum wallet integration
Stealth addresses for ETH
ETH mixing prototype

Week 3

Add Monero support
Harness Monero's native privacy tech
Cross-chain stealth management
Internal audits for security

Week 4

Unified app for BTC, ETH, and Monero
Multi-chain stealth workflows
Performance optimization + bug fixes
MVP beta release

Tokenomics

With a capped supply of **1,000,000,000 tokens**, it's designed for long-term sustainability and ecosystem expansion

Smarter Privacy, Powered by AI

ZenMixer

doesn't stop at mixing.
Our AI-driven tools enhance
every layer of privacy

Cross-Chain Mixer

Mix assets privately across Ethereum,
Solana, Optimism, and more,
directly via our Telegram bot from Day 1

Privacy Wallet

A secure, cross-chain wallet with
built-in stealth and mixing features,
coming soon as the second pillar of
our ecosystem

The People Behind ZenMixer

ZenMixer is built by a global team of cryptographers, blockchain engineers, and protocol designers. Our shared mission: to build a scalable, private, and future-proof decentralized ecosystem that empowers individuals worldwide
